## <VICENT SORNOSA />

### <ABOUT\_ME>

I consider myself a tech enthusiast who firmly believes in the development of **clean code** and scalable software. Coming from a self-taught coding background, I truly think that fundamentals in any language are a mainstay, and mastering them helped me to progress onto new **challenging projects**.

Currently, I study my fourth year of Computer Science degree at the Polytechnic University of Valencia, and although time is scarce, learning about other fields in tech such as **Penetration testing** by joining an ethical hacking club, helped me develop a wider view of the software world and provided more efficient ways on seeking **solutions**.

I am motivated and in seek of future projects where I can develop my skills whilst working and **growing alongside** the company.

### </ABOUT\_ME>

```
import { Experience } from './lastYears';

let Vicent = new Experience({,
```

**Hyperloop UPV (Aug20-Aug21)**: 'A year of near full stack experience where the aim was to code a functional and aesthetic GUI, using Angular framework with a Java connected middleware , to visualize in a logical manner more than 500 sensors located in our pod prototype named IGNIS',

**Neton EHC (Sept21-.)**: 'Ethical hacking club funded by a group of students in university where I learn advanced reconnaissance, vulnearability analysis and target exploitation skills in the field of cybersecurity with Kali Linux, currently eJPT certified and studying for OSCP',

**Bounsel (Feb22-Jul22)**: '6 month internship improving app performance using a new tech stack with VueJS, GraphQL, NestJS or MongoDB amongst other. Challenging deadlines and solving critical app functionalities were the two main challenges during this work experience',

**United Nations ICC (Sept22-.)**: 'Dealing with issues in complex architectures and high volumes of data in a distributed system of servers, whilst renewing and improving the performance of actual internal flows are my main duties at International Computing Center. Daily, I keep learning from more experienced colleagues and contribute to new ideas seeking always for near optimal solutions'

```
});
```

```
const speaks: Languages = {
  Spanish: 'Native',
  Catalan: 'Native',
  English: ['16 years at Caxton College', 'C1 Cambridge certified'],
  Italian: 'Basic professional proficiency'
};
```

### <MY\_EXPECTACTIONS>

I am seeking for an environment where my peers and I can interact in a positive manner in order to build up **team chemistry** and, therefore, create a solid work environment in **benefit** of the company.

Moreover, I believe in being able to grow intellectually and emotionally as a professional, as well as, **learning to learn** from more experienced people which already lead the tech industry.

### </MY\_EXPECTACTIONS>
